

ABSTRACT

A user commands a recording device (10) to store a recording (71) on a removable recording medium (70). The user selectively adds interactivity to the recording (70). In response to any added interactivity, the recording device (10) links the recording (71) and an interactive module (72) that is based on the added interactivity. The interactive module and an interactive link (73) representative of the link between the recording (71) are both stored on the removable recording medium (70).

(54) Title: **METHOD FOR ADDING INTERACTIVITY TO A RECORDING**

(57) Abstract: A user commands a recording device (10) to store a recording on a removable recording medium (70). The user selectively adds interactivity to the recording (70). In response to an interactive recording (71) and an interactive module (72) that is based on the recorded interactive recording (71) representative of the link between the recording (71) are both stored on the recording medium (70). The recording device (10) links the interactive module and an interactive link to the recording medium (70).
